Newsletter

Volume 27, Issue 2

March 2001

From the editor's desk ...

Our members were presented with a very serious question concerning the future of demography in Canada in the previous issue of the Newsletter. This important topic was raised by Warren Kalbach in the lead article of that issue. Members were asked to comment and to offer their points of view. Although no comments were received, the editor judges this topic of vital importance. Therefore the topic will be kept alive and the lines of communication will be kept open. Please send comments to Gustave Goldmann (gustave.goldmann@statcan.ca).

A new feature has been added to the Newsletter. A listing of useful WWW sites will be found under the banner "The WWW ...". Please let me know whether you find this useful and whether you want me to continue to include web addresses as part of the Newsletter. If the consensus is to keep this feature,

Continued on Page 2

CPS 2001 - Québec, May 27 to 29, 2001

The CPS meetings will be held in Québec this year at Laval University. The full program for the meetings is included elsewhere in this newsletter. The format for the meetings includes a number of fascinating panel sessions. As in past years, we are holding joint sessions with the CSAA and the Canadian Association for Research in Home Economics in which cross-disciplinary topics will be presented and discussed. There is also a joint session with the Canadian Historical Association focusing on population history. The discussions at these meetings will include analytical and methodological topics. Our honouree at the annual banquet will be Jacques Henripin, a renowned Québec demographer and certainly one of the senior sages in the field in Canada. The professional exchanges at meetings promise to be lively and rewarding.

CPS Officers: 2000-2002

President: R. Beaujot, UWO
Vice-President: F. Trovato, U of A
Secretary-Treasurer: R. Fernando, UWO

Councillors:

E. Fong	U. of Toronto
S. Loh	Statistics Canada
F. Mata	Canadian Heritage
J-L. Richards	UWO
H. Rosenbaum	U. of Winnipeg
M. Rosenberg	Queens University
R. Verma	Statistics Canada

CSP Journal Editor: W.W. McVey, U of Alberta.

CPS Newsletter Editor: G.J. Goldmann,
Statistics Canada

Report on the Federation of Canadian Demographers

There is a high possibility that the Federation of Canadian Demographers (FCD) will hold its conference on December 14 and 15, at Carleton University, Ottawa. The tentative title of the conference is: "Demographic Futures in the Context of Globalization: Public Policy Issues". A call for papers is expected to be sent soon. The composition of the organizing committee for the conference is as follows:

Chair: Bali Ram, Statistics Canada, and Carleton University

Members:

Roderic Beaujot, University of Western Ontario

Rosemary Bender, Statistics Canada

Ellen Gee, Simon Fraser University

Victor Piché, Université de Montreal

Jean Poirier, Université de Montreal

Mark Rosenberg, Queens University

Marc Termote, Université du Québec

News from abroad ...

Our dear colleague Karol Krotki offers us the following items of interest concerning Canadian studies in Poland. First, rumours have reached Alberta that an Institute of Canadian Studies will be created at the Jagiellonian University in Cracow with effect from September 2001. The Institute will live within a larger Centre of Regional Studies. Two staff members of the Institute known in Canada, while neither statisticians nor demographers, are data oriented. The Jagiellonian University is probably the second largest and most prestigious among universities in Poland (in existence since 1361?).

Second, the Canadian Studies Resource Centre at the Copernicus University, Torun, has been in existence for some time. A conference entitled 'Exploring Canadian Identities' is scheduled for 20-22 April 2001 in Torun. Among the 93 papers announced so far, 11 are in French, and 6 are probably data-oriented, though not necessarily using hard data (multiculturalism, ethnicity, integration, immigration from Eastern Europe). One brave soul from the University of Victoria is offering a paper on the nation state (the second on this continent to get it right? the first one is Derek Sayer). Among the 86 participants listed there are 18 based in Canada (one from Laval, one from U of A, not yours truly). No member of the CPS or ADQ drew my attention. The Canadian ambassador in Warsaw will open the conference (and provided some financial support?)

Keeping Posted ...

Personal and Professional Activities:

Roderic Beaujot presented a paper entitled "Earning and caring: Demographic change and policy implications" at the Distinguished Canadian Demographer Lecture, University of Alberta, 17 November 2000. He also presented an interpretation of family change, with implications for social cohesion, at a workshop on What Will Hold Us Together, organized by Justice Canada and Health Canada for Social Cohesion Network, Ottawa, 14 September 2000. Towards the end of this month he will be making a presentation on "Perspectives on

below replacement fertility in Canada: Value and cost of children, and structures of paid and unpaid work" at an IUSSP workshop on International Perspectives on Low Fertility: Trends, Theories and Policies, Tokyo, 21-23 March 2001.

Monica Boyd is the recipient of one of the 195 Canada Research Chairs, announced by Prime Minister Chretien on December 15. She is one of 15 researchers outside Canada to be so honored and the only demographer in that competition.

In August, **Tom Burch** participated in a workshop on 'Lexis in Context' at the Max Planck Institute for Demographic Research, Rostock Germany. His paper, 'Lexis in Context, The North American Case,' dealt with the relative neglect of the Lexis diagram by North American demographers. In February, Tom returned to the Institute for a workshop on 'Agent-Based Computation in Demography,' presenting a paper entitled 'Data, Models, Theory and Reality: The Structure of Demographic Knowledge.' Tom continues his research on modelling and theory, with special attention to fertility theory, under his SSHRC regular grant. In May Tom will participate in a workshop of the IUSSP Working Group on the Teaching of Demography, in Rabat, Morocco, with a paper entitled 'Teaching the Fundamentals of Demography: A Models-Based Approach to Family and Fertility.'

Eric Fong was invited to serve in the editorial board of American Sociological Review beginning January 2001. He organized a conference on "Comparative Perspectives on the Chinese Ethnic Economy" at the University of Toronto in early September. He is editing a special issue of Asian and Pacific Migration Journal based on papers presented in the conference. He is currently spending his sabbatical at the UCLA and writing a book on ethnic economy. He is a co-organizer of the Annual Meetings of the North American Chinese Sociological Association, held in Washington, D.C. In August 2000 he was invited to organise a thematic session on "Asian and Race Relations in the U.S. and Canada: Emerging Patterns, Increasing Diversity," for the Annual Meetings of the American Sociological Association, Washington, D.C.

Continued on page 4

Ellen Gee has been awarded a 2001 Outstanding Contribution Award by the Canadian Sociology and Anthropology Association for scholarly and professional contributions to Canadian sociology.

Shiva Halli was on sabbatical from July 1 to December 31, 2000. During his sabbatical he presented a paper in Czech Republic at the International Conference on Pluralism. The title of his paper is 'Low Income Immigrants in Canada, 1996'. While he was in Europe he was invited by WHO Geneva and the University of Groningen, Netherlands to give seminars. He spent 3 months in India and completed an UNFPA funded project titled, 'The Study of Sexual Behaviour and Extramarital Relations in a South Indian Village'. While he was working on this project in India he was invited by the UNFPA Rep in Sudan to help them analyse the first national survey data on Safe Motherhood. He has completed six state reports and made presentations to the state Health Ministers. Important health policy recommendations were made including prevention of female circumcision. Female circumcision is almost universal in Sudan and it has serious health complications.

Gustave Goldmann is presenting a paper on the "Immigrant/High Technology Industry Nexus" with **Tom Caplan** of the Israeli Central Bureau of Statistics. This paper will be presented at Economics 2001 in Ottawa, May 2001.

Laurie Goldmann has recently moved within Social Policy Group of HRDC from policy development focussing on homelessness to the implementation of the Early Childhood Development Agreement in Children's Policy.

Susan McDaniel was nominated for the University of Alberta's Alumni Wall of Fame, 2001. She was also nominated for the University Cup, University of Alberta (the highest honour the University confers, awarded in recognition of faculty members who have excelled at both teaching and research), 2001. In addition, Susan was appointed to the International Advisory Board, British Journal of Sociology, for the

term 2001-2006, to the International Organizing Committee, Pacific Sociological Association, 2002 meetings, April 2002, in Vancouver and to the International Scientific Committee, 2001 BUGS International Conference, International Sociological Association, Montreal, September 2001.

Susan was invited to present "Information and Communications Technologies: Bugs in the Generational Ointment?" at a plenary session for **2001 BUGS: International Sociological Association Conference**, Montreal, 19-21 September 2001. She was also invited to present "Tangled Hierarchies and Strange Loops: Challenges Of/To a Risk Society of Intimate Relations," as a plenary paper for the World Congress of Sociology – **The Social World in the 21st Century: Ambivalent Legacies and Rising Challenges**, in Brisbane, Australia, July 2002.

Susan will present the following conference papers: "Managing the Deception: The Promise of Better Living Through Globalized Population Control," Paper invited for the International Sociological Association Regional Conference for Latin America and the Caribbean, 7-12 May 2001, Caracas, Venezuela, and "Continuities and Transformations: Challenges to Capturing Information about 'Information Society,'" (with Fred Gault, Statistics Canada), **2001 BUGS: Globalism and Pluralism**, International Conference, Montreal, 19-21 September 2001.

Roger Sauve of People Patterns Consulting published 3 reports on Western Canada. The titles were *Alberta People - Trends and Projections*, *BC People - Trends and Projections* and *Saskatchewan People - Trends and Projections*. Roger also produced a report called the *The Current State of Canadian Family Finances - 2000 Report* for the Vanier Institute of the Family. The report was released in early February and got national coverage including the CBC National News and the National Post. Links to all reports can be found at Roger's website (www.telusplanet.net/public/rsauve)

Russell Wilkins, Edward Ng and Jean-Marie Berthelot will presented "Trends in mortality by income in urban Canada from 1971 to 1996." during session 410: Causes of death analyses, differentials and trends at the Population Association of America (PAA), Washington DC, 29-31 March 2001.

Russell Wilkins, Doug Manuel and Geoffrey Anderson. Presented "Ecologic approaches for assessing socioeconomic factors in health services research." at a Workshop. Symposium on Predicting Health and Health Services: Data, Methods and Models. Toronto, Institute for Clinical Evaluative Sciences (ICES) and Ontario Health Intelligence Units, 22-23 January 2001. Economic Reforms and Fertility Behaviour: A Study of a Northern Chinese Village.

Zhang, Weiguo, *Richmond: CURZON (to be published in Feb. 2001).*

This book focuses on the way deliberate Chinese state policies driven by new economic and social agendas since the late 1970s have impacted on marriage, family relations and consequently on the way fertility trends have been adversely affected.

336 pages; Cloth: ISBN 1-873410-49-2 £40.00.

In Memoriam

JUDITH HARRINGTON (... - 2000)

Roderic Beaujot, Alan Simmons, et al

Judith Harrington died on 4 December 2000. She had graduated from Western's M.A. program in 1969, going on to do her PhD at Cornell, then worked at CIDA, the United Nations and the World Bank.

Judy was a leading member of the community of Canadian demographers. She was a long-time member of the Canadian Population Society and had close relationships with many members of the Association des démographes du Québec. Her untimely death at such a young age and at the peak of her professional work shocked and saddened us. She is remembered as a warm and vibrant personality whose personal attributes and strong professional skills combined to make her one of the forefront people in the population and development field. Her seemingly boundless energy and passionate commitment to improved programs and policies had a major impact on the agencies where she worked, particularly at CIDA and the World Bank, and on the international community more generally. She is particularly well known for her research contributions to and support of programs for improved maternal and child health in Africa and other developing regions.

Judy was a bright light in the population field, being one of the first demographers educated in Canada, with numerous relationships across the country and beyond. Many people have sent messages; Alan Simmons talks about Judy's dynamism, originality and good humour, Evelyne Lapierre-Adamcyk speaks of "telle vitalité," Michael Shenstone says she was "one of my very first and best teachers about population," George Brown speaks of her as colleague who will be sorely missed. Katherine MacDonald writes that Judy "wore her heart on her sleeve and was always prepared to make an impassioned plea for the causes in which she believed." Danièle Laliberté speaks of having heard much of Judy Harrington's work in Africa while doing her own research.

P. Krishnan and Susan McDaniel reflect on their student days together at Cornell. Krishnan observes that she was there to cheer others in spite of her own personal problems, and in particular encouraged him to apply for a position in Canada. Victor Piché also reflects on days at Cornell when they both wrote dissertations on Niger based on surveys carried out by their professor Ian Pool. Piché writes, "since those wonderful years of student life and fieldwork in the villages of Niger and the former Upper Volta, we have been in close contact not only for professional reasons but because we shared the same vision of what population and development should mean. She was so energetic, original, stimulating, and had a tremendous sense of humour." Ian Pool writes that both of his children, now in their 30s, also had very fond memories of Judy, especially in Africa.

Judy Harrington was an energetic and courageous person, willing to question assumptions and always working toward improving the welfare of the most disadvantaged. She cared deeply about the big issues and about the lives of individuals. She will be cherished for many things – her intellect, her humour and her tremendous devotion to improving connections for people in the world around her. She was a source of love, support and inspiration for many people – her friends, her family and her colleagues. She opened her heart and her home to people of many ages and from many walks of life. She will be sadly missed but fondly remembered by a network of people that spans the globe.

Recollection by *John Samuel*

We both were in Mexico City in 1984 as Canadian delegates to the World Population Conference and I remember her ready enthusiasm for participation in its deliberations. Her enthusiasm was no less for participating in sightseeing and shopping as well. Her bubbly spirit and cheerful smile are fresh in my consciousness despite the passage of almost 17 years.

Continued on page 8

PROFESSOR S. N. Singh (1924-2000)

Paramerswara Krishnan

Shoba Nath Singh, formerly Professor of Statistics in the Department of Mathematics and Dean of Science at Banaras Hindu University, passed away in the month of February, 2000. He had done his graduate program in Statistics at the University of California, Berkely. He worked with Professor Jerzy Neyman for his doctoral dissertation. He modified the stochastic model for estimating the number of fish developed by Neyman to study human fertility. Introducing the notion of monthly probability of effective conception, he set up a model for the number of children born to a woman during the reproductive period. He pursued the stochastic model building avenues on his return to India and created a school of mathematical demography in the subcontinent. Prof. Singh was behind the setting up of a Population Studies Centre at BHU which he directed for a long time. Many Ph.D. students of Dr. Singh have contributed to stochastic modelling research in India.

Long before Mindel Sheps and Edward Perrin explored into stochastic modelling of the fertility process through simulation studies, Dr. Singh had already developed, following Neyman's Best Asymptomatic Normal (BAN) procedure estimates of the Gini fecundability parameter from field data. Dr. Singh and his associates had used mixing distribution to account for variation among individuals with respect to the various parameters. Many students of his hold, or have held, significant professional positions, academic and non-academic, in India and abroad. Dr. K. B. Pathak, former Director of the International Institute of Population Sciences in Mumbai, deemed as a university, was a graduate student of Dr. Singh.

Prof. Singh's articles have appeared in ***Sankhya***, Journal of the American Statistical Association, Biometrics, Health and Family Welfare, Demography India and others. He has edited a two-volume publication on Population Transition in India with Ashish Bose and P. S. Bhatia (B. R. Publishing Corporation, 1989). This two-volume book consisting of 78 research papers was prepared on the occasion of the SAARC conference on population and the IUSSP's 21 St. International Population Conference held in New Delhi in September 1989. Prof. Singh was the ***rapporteur*** of the papers in demographic mathematics presented at the 1972 Indian Census Centenary Seminar held in New Delhi. This author had a paper contributed to that session while doing his graduate studies at Cornell.

Dr. Singh's mathematical demography heritage continues with his former students and his son, Dr. K. K. Singh, Department of Mathematics, BHU. Dr. Singh's family may be said to be a family of mathematicians/statisticians. His younger brother, Dr. M. P. Singh, is a Statistician in the Methodology (Sample Survey) Division of Statistics Canada. As a junior faculty member in the Department of Statistics, University of Rajasthan, Jaipur working on different statistical problems, I was influenced by his research papers on stochastic modelling of fertility that appeared in various journals. This influenced me to take to mathematical demography as my area of research which I pursued while doing my graduate program at Cornell University. I had met with him in 1972 at the Indian Census Centenary seminar. In 1994, I was invited to present a few lectures at the Departments of Mathematics and Sociology at Banaras Hindu University, Varanasi. Prof. Singh had retired from active academic life by that time. I had the opportunity to meet with him at his home. Even during his retired life he was active as ever in demographic research.

**Preliminary Program - Annual meetings of the Canadian Population Society
